

# Day 3/180 Introduction to c++

- **Print number**

1. Two numbers are given, print their product
2. Two numbers are given a and b, print a-b
3. Print 6\*3 in output, don't print 18, just 6\*3 should be in the output screen.
4. If we have only 4 bits, How 3 and -6 will be written in 4 bits.
5. If we have only 5 bits, How 13 and -16 will be written in 5 bits.
